HOW TO VERIFY THIS YOURSELF

1. Look up HIP 34444 in the SIMBAD astronomical database (<https://simbad.cds.unistra.fr/simbad/sim-id?Ident=HIP+34444>) and confirm the star exists and that the right ascension, declination and magnitude on this certificate match it.
2. Open the permanent link <https://star.org/s/fmpkdcnpa/> — the claim number on that page matches this certificate.
3. Search the star identifier HIP-34444 in the public registry <https://star.org/registry/>. Exactly one record should come back; if the same star appears twice, the registry is inconsistent and we would like to hear about it.
4. Claim records are stored as text files under `data/registrations/` in the public repository, readable by anyone without an account.
